

Rife International

Client: General Services Administration (GSA)

Owner: Internal Revenue Service – Child Care Center

Project: Installation of Finger Guard Devices

Location: Lanham, Maryland

Rife International, serving as a General Contractor to the General Services Administration (GSA), provided and installed finger-guard devices at the IRS-MD Child Care Center located at 5000 Ellin Road, Lanham/Seabrook, Maryland. Under this project, Rife provided all necessary labor, supplies, materials, and equipment to install the finger guards on a total of 100 door structures located inside the Child Care Center.

In doing so, Rife helped GSA to safeguard the Child Care Center and reduce the risk of injury to small children occupying the space.

Additionally, Rife International managed the high level security coordination efforts on this project. Our efforts included securing access for our subcontractors during non-work hours and weekends.
