

Rife International

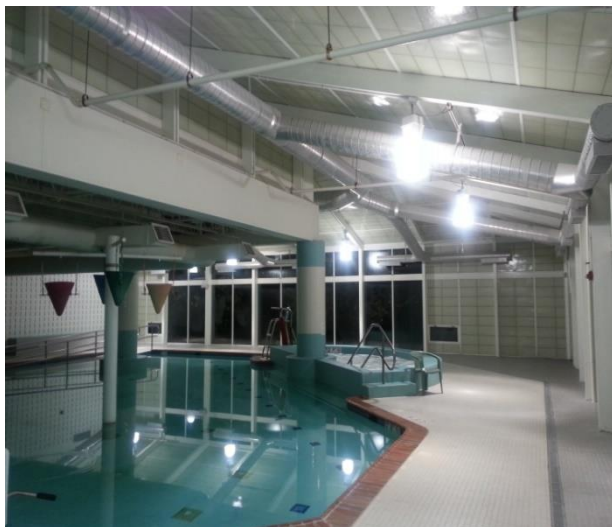

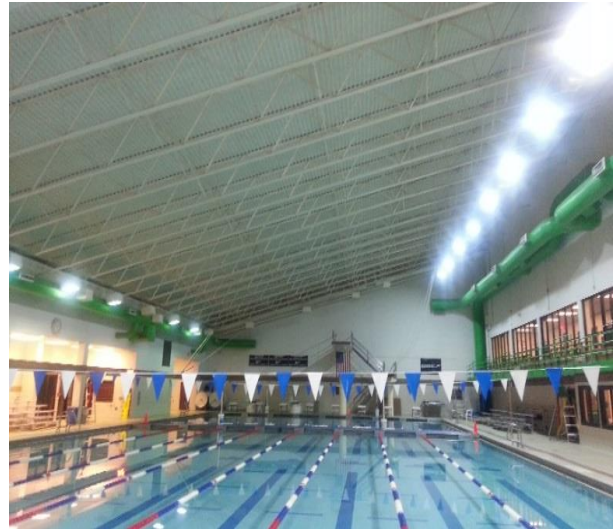

Client: Montgomery County Government, Department of General Services

Project: MLK Swim Center Lighting

Location: Silver Spring, MD

Rife International provided labor and materials for the replacement of lighting fixtures at MLK Swim Center in Silver Spring, MD. Rife performed an audit of the space and proposed energy efficient lighting, which would save the aquatic center over \$15,000 in annual energy costs and require no maintenance for approximately 5 years.

Rife replaced several inefficient lighting in the pool area including 1000 Watt Metal Halides with New energy efficient Venture 40,000 Hour Long-Life Pulse Start Kits. This project reduces energy consumption by 64,201 KWH per year, which is equivalent to 18 acres of trees planted per year or 10 cars removed from the road per year.
