

## Energy Efficiency Specialist

### Job Summary

RIFE International is an award-winning, global energy-efficiency and sustainable construction services firm offering solutions to government, institutional, and commercial entities. We specialize in providing tailored services aligned with best practices that allow our customers to reduce operating expenses and maximize ROI.

We are currently seeking an experienced Energy Efficiency Specialist to play a key role in our company. This opportunity will allow you to use your creativity and innovation in the continued growth of our energy efficiency practice. As our Energy Efficiency Specialist, you will be responsible for the design, development and execution of energy conservation projects. You will perform extensive energy audits during site visits and identify the most viable, cost effective Energy Conservation Measures to implement on the Client's behalf.

### Essential Duties and Responsibilities

- Identify, qualify, audit and sell energy efficient lighting, transformer, VFDs/motors and mechanical improvements, among others
- Utilize existing relationships to develop opportunities
- Prepare and present detailed proposals to end users encompassing turnkey project installation, utility incentives, positive cash flow financing and EPACT compliance
- Conduct accurate and complete lighting assessments by collecting existing data to recommend the proper energy efficient measures and generating a detailed proposal based on findings.
- Travel to projects as needed

### Qualifications:

- Bachelor's degree (Masters' degree preferred) in Engineering, Business or related field
- 3-5 years of energy experience including energy audits and energy monitoring
- Certified Energy Manager (CEM) or and or Energy Manager in Training (EMIT)
- In depth knowledge of energy efficiency, including development of ECMs, energy modeling and calculations
- Proficiency in Excel and other analytical software tools
- Strong written and verbal communications skills in English
- 3- 5+ years in lighting retrofit, energy efficiency or similar fields
- Experience in conducting energy audits and using energy analysis tools
- Energy conservation project experience: screening, development, and implementation
- Understanding of building efficiency/sustainability solutions
- Strong presentation and communication skills
- Must be proficient using a laptop/tablet/smartphone

### Preferred Experience:

- Experience conducting ASHRAE Level III
- Knowledge of federal organizations and Working knowledge of EPACT 05, EO 13514, ASHRAE Auditing Procedures, Level I and II, ASHRAE 90-1, etc.
